

## Enjoy the taste of Ireland at Olde Blind Dog

Olde Blind Dog is honored to receive the nomination of First Runner Up in the 2017 Best of North Atlanta Awards. As your neighborhood Irish pub with 2 Atlanta locations, we are grateful to the readers for your votes and constant support.

For the past 8 and a half years, Olde Blind Dog has worked to be a part of our wonderful community by sponsoring local schools and many community causes. One of our biggest events of the year takes place around St. Patrick's Day as we raise money and awareness for childhood cancer

through the St. Baldrick's Foundation.

As for fun and good food, Olde Blind Dog in Milton or Brookhaven would love to be your next entertaining space. Ideal for celebrations, sports crowds, and other gatherings, our fusion of Irish and southern hospitality makes for the perfect place for any get-together. We look forward to many more years of serving up our Celtic favorites for brunch through dinner! So come on in, grab a pint, and enjoy a little piece of Ireland here in the heart of Georgia.

## Minimally invasive surgical options in gynecologic medicine

The field of gynecologic medicine has advanced by leaps and bounds over the last several years. Gone is the necessity for large incisions and long recoveries. According to Dr. John Reyes, Dr. Ingrid Reyes, Dr. Natu Mmbaga, Dr. Annie Kim and Dr. Stacey Pereira of Modern Ob/Gyn, minimally invasive procedures are almost always the best options for patients.

Heavy bleeding and painful cycles can now be treated with same day convenient in-office procedures that require no downtime and can be done in the office.

There are so many great options for women; it's our job to get that information to them and make them aware they don't need large incisions, long hospital stays, or painful recovery times," Dr. John Reyes said. "da Vinci robotic surgery is also an amazing service." Endometriosis, pelvic pain, fibroids, cysts and other common issues are sometimes best addressed with robotic surgery.

As the first surgeons to perform da Vinci gynecologic robotic surgeries at Emory Johns Creek Hospital, Dr. Ingrid and Dr. John Reyes pioneered the implementation of this fast-growing service in our community. Patients benefit from robotic surgery by having less risk for complications, short overnight hospital stays, faster recovery times, and minimal pain.

Modern Ob/Gyn dedicates its gynecologic practice to minimally invasive surgeries and is an experienced leader in our community for robotic gynecologic surgery, performing these procedures at Emory Johns Creek Hospital and Northside Hospital-Forsyth.

The physicians at Modern ObGyn enjoy providing second opinions and consultations because they believe it is vital to make patients aware of their choices.

"We really value educating our patients so they understand their medical issues, why certain treatments are better than others, and what their options are for treatment," said Dr. Ingrid.

"There are so many great options for women; it's our job to get that information to them and make them aware they don't need large incisions, long hospital stays, or painful recovery times." Modern OB/Gyn
